

KLIX[®]

KLIX Momentum

Welcome to a new frothing experience

A richer, more satisfying break

Your KLIX machine will be equipped with the KLIX advanced frothing system, a retrofitted kit that transforms the quality of your Lavazza coffee specialities, for a richer, more satisfying break.

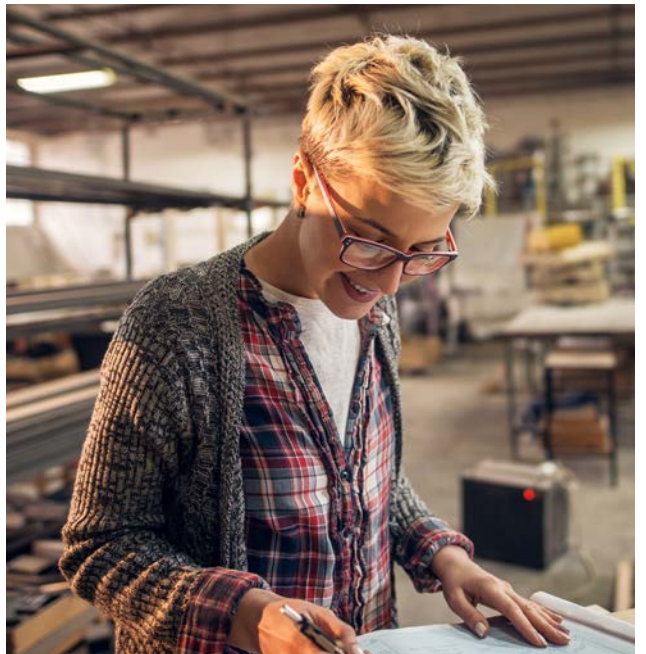

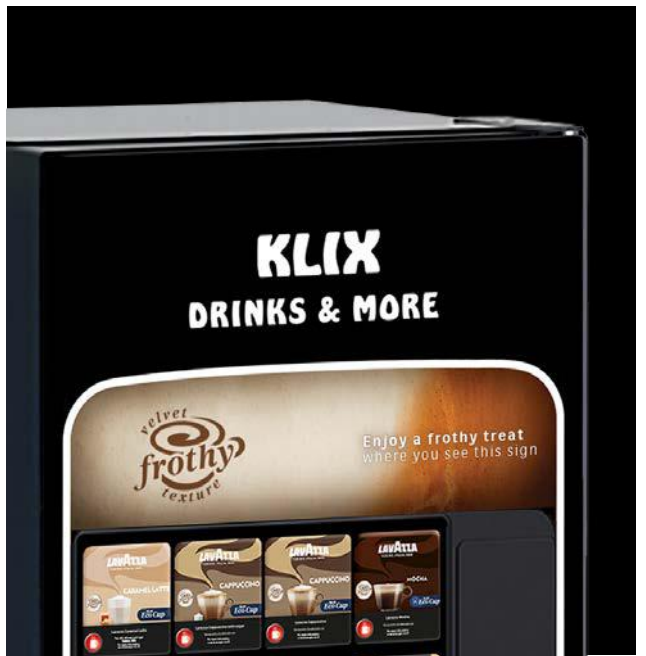

Advanced frothing system

By applying a flow of water characterised by high velocity and low volume, the drinks aerate. This is when the magic happens and a velvety, rich foam emerges from the cup, ready to be enjoyed!

Before

Now

The Lavazza coffee experience at the heart of your workplace

A new and improved coffee experience is coming to KLIX.

With new rich and frothy coffee specialities from Lavazza, KLIX is offering a new premium break to enjoy every sip.

Either you love Lavazza Cappuccino, Mocha or one of our delightful Lattes; a tempting lusciously milky everyday treat will be ready in just an instant!

The new KLIX range* includes new premium drinks as well as nationally recognized favourite brands, to make everyone happy.

There is nothing like the luscious pleasure of milk froth on your favourite coffee, now available on KLIX!

All your favourites, in an instant

Whether you run a factory, hospital, retail space or an office break room space, we know you and your co-workers are looking for a quick, refreshing break. Our range of industry leading KLIX® machines with patented in-cup technology deliver the perfect instant drink just as you like it.

Exceptional range of instant drinks & options

With both hot and cold drinks available in a single machine, choose from the nation's favourite coffee, tea, hot chocolate, cappuccino, latte, juice drinks, water and even soup.

In-cup technology

KLIX is now featuring the new advanced frothing technology, a special jetting kit designed to upgrade your current KLIX machine.

At the heart the jetting kit is the multifunctional nozzle, designed with a special conic shape to create exactly the right waterflow, at the ideal pressure and precise angle, to perfectly aerate the drink, avoiding any spitting and mess!

Industry leading reliability, built-in

Our machines are manufactured to meet the demands of heavy usage and our expert engineers are committed to keeping your machine working at an optimum level to avoid breakdowns and keep your people on the go, with industry leading 99.7% up time.*
